The aim of this symposium is to learn about the amazing work being done by CMSI grad students and postdocs, to foster community, and to identify opportunities for synergy and collaboration. Talks will be in a short format (five minutes long), lending to a more conversational and storytelling presentation style intended to stimulate the exchange of new and exciting ideas. Coffee/beverages and appetizers breaks will be provided and used for extended discussion.

Please RSVP to present and/or attend by May 1st
